

## Versatile Solution

### PcDictate & Digital Portables

PcDictate is a software app for PC dictation. Digital portables offer reliable, mobile dictation. Some benefits are:

- Variety of USB mics supported
- Barcode accessories available
- Visual icons make dictation easy
- Dictate while on the move

### Telephony Dictate Stations

Stations can add great features to telephone dictation. For example:

- Slide-switch mics
- Barcode scanners
- Hands-free input with foot control
- Conference or interview mic add-ons

### Internet & Telephone Transcription

Transcription can be done with a telephony station or now with iNet, a network/internet application. Some of iNet's benefits are:

- See all available dictation
- Easy search and report tools
- Administrative routing & editing

### Easy Management Tools

Whether a computer expert or novice, basic system administration is a breeze. With a few clicks you can:

- Create, edit, and delete user profiles
- Create and edit custom dictation filters
- Export dictation, adjust security levels & more!

## Trusted Solution

Phoenix is trusted by organizations around the country. Some of these markets include:

- Hospitals & Medical Offices
- Law Firms
- Government Agencies
- Transcription Companies
